

Political Problem Statement

Author: Minna Azeem

Problem Statement:

- An easy way to see what we can do politically doesn't exist.

Who is experiencing the problem?

- Everyone needs a better way to see who they would want to voting for.

What is the problem?

- A lot of political information is hard to find and/or trust.

Why does it matter?

- The people voted for by the population can effect how we live, if people don't know information about what they can vote for and/or who to vote for, they may miss out on opportunities or vote for something or someone they don't actually want.
